- Icons

3 Design Process

Calpine Creative follows a simple and proven process to define and design the suitable and user friendly concepts.

- Discovery Phase:**
The first step in understanding your requirements, which can be supported by documents and references.
- Wire Frame:**
The second important step, which will give a rough sketch about the design and skeleton.
- Feedback Corrections:**
Important step before entering the final design phase, here you will suggest your feedback for further changes to the wireframe.
- Design**
Based on the corrections the final phase of design is started. Ultimate attention given to the mission of the site and it is basic design elements decided.
- Implementation:**
Once the design is again corrected for any changes suggested, it is moved for the html conversion and implimentation.
- QA + Delivery**
Once the design phase is over with html , the Quality Assurance team cross checks for any error and performance issues.
